OPTIONAL

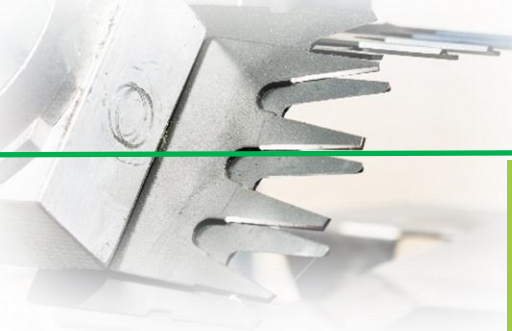

- Fertilizer hopper in STAINLESS STEEL for granular fertilizers

Supplied with two separate easily adjustable pruning blades, the EK 2000 ECO pruner makes it possible to trim a sequence of potted plants, shaping them to the desired form with surprisingly uniform results.

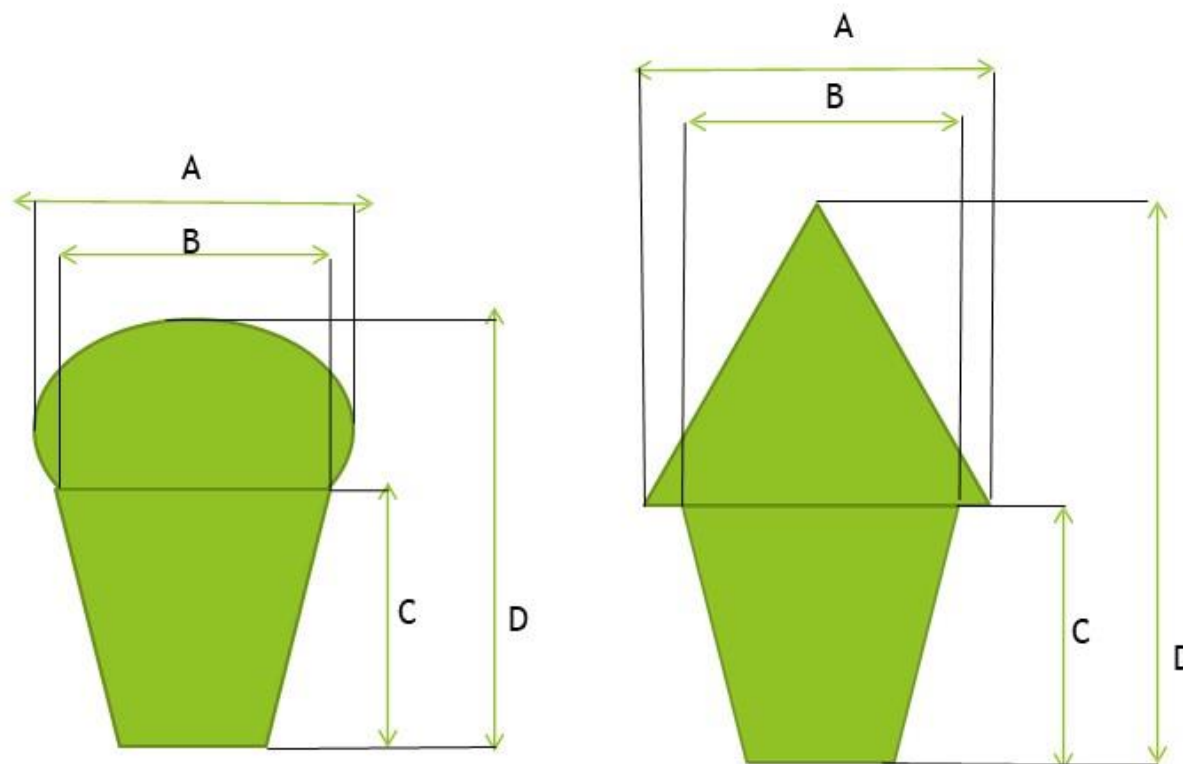

The brand new EK 2000 ECO will amaze you, not only with the precision of its cutting but above all with its capacity to prune over 2400 Ø 14 pots every hour **INCLUDING THERMOFORMED POTS**

In addition, thanks to the new patented pot rotation system, it is possible to easily prune dense plants and those with thick stems that are normally very resistant to cutting.
